

Road junctions along the way of the vocational guidance of young people

The progression of choosing a professional career includes challenges or even obstacles, discussions or concerns. Each student makes his/her own efforts to arrive successfully at the end of this route. The ways of all the students for the final choice are not parallel, but they have as a basic point of reference the moral and material support of their family environment and their teachers.

Within this context, the Parents' Association of Evangeliki Model High School organized four informative and educational meetings, where parents and students are informed by experts, crossing their views and experientially involving in special laboratories.

"Career paths cross over into the careers of science, technology, engineering and mathematics"

Sunday 12 November at 17.30-21.00
